

How to acknowledge CNCA

CNCA is required to provide evidence of the work made possible through the usage of the infrastructure services. The metric of success is the scientific publications produced through the usage of the CNCA services.

Please help us to continue delivering services to the academic and research community, by acknowledging the usage of CNCA in your scientific publications.

This will help us in our efforts to provide better services to our users. For that, we suggest the use of the following acknowledgement text in the publications:

“ This work was produced with the support of CNCA funded by FCT

Acknowledging the use of CNCA in conference proceedings, talks, posters, web sites, videos, etc is also welcomed. You can also acknowledge the use of CNCA in multimedia content and web sites by using the CNCA logo, please get in touch with the [CNCA support helpdesk](#) to make sure the usage of the CNCA logo matches the CNCA policies.

- [Logo black SVG](#)
- [Logo black Horizontal SVG](#)
- [Logo black Vertical SVG](#)

CNCA needs to collect and report the publications, posters, talks etc that resulted from its usage. Please report periodically those outputs to the [CNCA support helpdesk](#) and also provide us your feedback.
