Resource Consuption

- The consuption can be monitored by a user by the report command.The command shows to two period current month + full consuntpion for each associated QOS. Users with more than one QOS will show separetely

```
[root@cirrus08 ~]$ report --user fabiananeves
```

- On this example the user fabiananeves consumed 50920 mins of the cpca582052022 total consumed for the period 2023-12-01T00:00:00 - 2023-12-06T12:59:59.
- On the second line you have the total QOS consumed 157722 mins (red bar) and in brackets you have the QOS atributed (cpu=1800000). The blue bar show the difference bettween the total and the consumed.
